Agricultural Statistics of India

1918-19

VOLUME II—INDIAN STATES

Introductory Note

This volume deals with Statistics for Indian States as far as reported. ^{General} As in the previous issues, summary tables have been inserted to show the total figures relating to area, the classification of area, and the area under crops for each State or group of States, and the totals for all the reporting States. The total number of cattle as far as reported in each of the years 1906-07 to 1918-19 has also been included in the general summary table (No. 1). These statistics are defective for comparative purposes as additions have been made in the number of reporting States from time to time. Explanatory notes have been inserted at the foot of the tables. Two charts and an index for easy reference have been added to the volume. It should be noted that, for the reasons explained below, the agricultural statistics of Indian States are incomplete and are of far less accuracy than those of British Provinces published in Volume I. The question of the improvement of the statistics of Indian States has been taken up by the Government of India, and it is expected that more complete and accurate statistics for them will be available in the near future. As these States comprise one-third of the total area of India, the importance of their statistics in the all-India returns can scarcely be over-estimated.

The total area of Indian States is approximately 497,000,000 acres (770,000 square miles), with a population of 72 millions according to the census of 1911. These are divided for the purposes of agricultural statistics into two main classes, namely, (1) States within the jurisdiction of Local Governments and Administrations, and (2) States having direct political relations with the Government of India.

(1) *States within the jurisdiction of Local Governments and Administrations.*—The total area of these States is 181,060,000 acres, with a population of about 27 millions. They are divided into the following main groups:—

	Area Thousand acres	Population Thousands
Bombay and Sind States	40,878	7,412
Madras States	6,802	4,812
Punjab States	24,511	4,213
Bihar and Orissa States	18,835	3,945
Central Provinces States	19,960	2,117
Burma States (including Shan States)	38,402	1,540
North-West Frontier Province States (including tribal areas)	16,380	1,379
United Provinces States	4,345	832
Bengal States	3,477	823
Assam States	7,970	346
Total	181,060	27,419

The total area of all these States (with the exception of the greater part of the Shan States in Burma and the tribal areas in the North-West Frontier Province) is included in the areas of the respective British Provinces stated in column 2 of table I of Volume I (British India), but are shown separately in column 3 of that table in order to arrive at the net area of British territory (in column 5) dealt with in that volume. Of these States, agricultural

statistics are at present available only for the following thirty-three States in the Madras and the Bombay Presidencies and the Punjab, and are dealt with in this volume :—

The total area of all the fifty-three reporting States named above amounts to 196,642,000 acres, with a population of nearly 33 millions. These States, therefore, represent 40 per cent of the total area, and 46 per cent of the total population, of all the Indian States.

The earliest years from which the statements of agricultural statistics have been received from these fifty-three reporting States are noted below :—

Mysore	1886-87
Jaipur	1892-93
Gwalior	1896-97
Bikaner, Marwar, Tonk	1898-99

Kashmir	1910-11
Baroda, Bundi, Phaltan, Aundh, Sachin, and Jath	1918-19

The returns for the different States relate to the years ending on the dates stated below, so far as information is now available :—

Bikaner, Sandur, Banganapalle	year ended 31st March
Indore	" in June
Jath	" 6th June
Mysore, Gwalior, Nagod, Pudukkottai, Narsingarh, Phaltan, Aundh, Barwani	" 30th June

Bundi	" 14th July
Sachin	" 31st July

Jaipur	" 31st August
Kishangarh	" 15th September

Tonk, Rajgarh, Bharatpur, Alwar	" 31st October

From the total area of all the fifty-three reporting States (196,642,000 acres), deduction must be made of 107,552,000 acres for which statistics are not available. These comprise chiefly unsurveyed areas and lands held on jagir, muafi, and other privileged tenures. The net area actually covered by these statistics is, therefore, only 89,090,000 acres by professional survey,* or 88,839,000 acres according to village papers.*

This area is classified, for the purposes of agricultural statistics, as shown in the margin. About

	Thousand acres	Per cent
Forests	10,167	11.4
Not available for cultivation	20,188	22.7
Culturable waste other than fallow	15,413	17.4
Current fallows	13,702	15.4
Net area cropped	29,369	33.1
Total	88,839	100

10,167,000 acres, or 11.4 per cent of the total, are occupied by forests; and the area not available for cultivation, that is, land absolutely barren, or unculturable, or covered by buildings, water, and roads, or otherwise appropriated to

* For explanation of the terms "professional survey" and "village papers," see footnotes to Table I (page 6) of this Volume and the Note prefixed to Volume I

uses other than agriculture, amounts to 20,188,000 acres or 22·7 per cent. The balance, 58,484,000 acres or 65·9 per cent, represents the area available for cultivation. Of this, 15,413,000 acres, or 17·4 per cent of the total area, represent culturable waste, i.e., land available for cultivation but not taken up, and 13,702,000 acres, or 15·4 per cent, were kept fallow in the year under report. The net area actually cropped in the year was thus 29,369,000 acres (33·1 per cent of the total area), which shows a decrease of 3,618,000 acres as compared with the preceding year. This net cropped area, however, excludes areas cropped more than once in the year. If areas cropped more than once are taken as separate areas for each crop, the gross area cropped in the year of report amounts to 30,745,000 acres, as against 37,173,000 acres in the preceding year.

igation

The total area irrigated in the reporting States during 1918-19 was 6,200,000 acres, as against 6,187,000 acres in the preceding year. Of this, 1,794,000 acres were irrigated from Government canals, 722,000 acres from private canals, 723,000 acres from tanks, 1,554,000 acres from wells, and the remaining 1,407,000 acres from other sources of irrigation. These figures, however, do not take into account areas cropped more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. If areas cropped more than once are counted as separate areas for each crop the gross area of irrigated crops amounts to 6,721,000 acres, against 7,162,000 acres in the preceding year. Of this area, 5,856,000 acres were under food crops.

ble III.
es under crops

The gross area cultivated with crops in the reporting States was, as stated above, 30 million acres in 1918-19, as against 37 million acres in the preceding year,

or a decrease of 19 per cent. The different classes of crops and the area occupied by each, so far as details are available, are stated in the margin. Of the total cropped area, food crops occupied about 24,015,000 acres or 80·3 per cent and non-food crops about 5,884,000 acres or 19·7 per cent. Of the food-crops, food grains (cereals and pulses) occupied as much as 22,537,000 acres, or 75·4 per cent of the total cropped area, and other food crops (condiments and spices, sugar, fruits and vegetables, and miscellaneous food crops together) covered some 1,478,000 acres, or only 4·9 per cent of the total. Of the non-

food crops, oilseeds occupied 1,195,000 acres or 4 per cent of the total cropped area, fibres such as cotton, hemp, etc., 2,302,000 acres or 7·7 per cent, and fodder crops 1,101,000 acres or 3·7 per cent. The other non-food crops, namely, dyes and tanning materials, drugs and narcotics (tobacco, tea, coffee, opium, etc.), and miscellaneous non-food crops together, covered some 1,285,000 acres or 4·3 per cent of the total.

The area under food-grains (22,537,000 acres) shows a decrease of

	Thousand acres

5,336,000 acres as compared with the preceding year. The actual increase or decrease under each kind of grain is stated in the marginal table. It will be seen that, with the exception of jawar and maize, all the grains showed a decrease, the most marked decrease being in the area under the two

principal *rabi* food-grains, wheat and gram.

The area under oilseeds (linseed, sesamum, rapeseed, mustard, etc.) decreased by 842,000 acres or 41 per cent, that under drugs and narcotics by 24,000 acres or 9 per cent, that under condiments and spices by 112,000 acres or 38 per cent, that under fruits and vegetables by 293,000 acres or 45 per cent, that under dyes and tanning materials by 15,000 acres or 68 per cent, and that under fodder crops by 209,000 acres or 16 per cent. The area

under sugar showed an increase of 3,000 acres or 2 per cent, and that under fibres (cotton, hemp, etc.) increased by 505,000 acres or 28 per cent.

The total extent of land on which more than one crop was raised during the year was 1,376,000 acres, as against 4,156,000 acres in the preceding year.

Tables IV, V, and VI are very incomplete, as figures for these tables are not furnished by many of the reporting States. Table IV is prepared by only twenty-seven States, namely, Mysore, Pudukkottai, Banganapalle, Sandur, Cochin, Gwalior, Indore, Bhopal, Rajgarh, Narsingarh, Barwani, Nagod, Bikaner, Marwar, Jaipur, Kishangarh, Alwar, Bharatpur, Jhalawar, Tonk, Kotah, Bundi, Baroda, Phaltan, Aundh, Sachin, and Jath. According to the latest statistics, the total number of live-stock of the bovine class (bulls and bullocks, cows, buffaloes, and calves) in these twenty-seven States is 15,916,000, that of the ovine class (sheep and goats) 10,422,000, and that of horses and ponies, mules and donkeys, and camels 472,000. The numbers of ploughs and carts are 2,232,000 and 683,000, respectively.

Table V (Land Revenue) is prepared by twenty-five States, namely, Mysore, Pudukkottai, Banganapalle, Sandur, Cochin, Gwalior, Indore, Bhopal, Rajgarh, Narsingarh, Barwani, Bikaner, Nagod, Marwar, Jaipur, Alwar, Bharatpur, Jhalawar, Tonk, Kotah, Bundi, Phaltan, Aundh, Sachin, and Jath; and Table VI (Transfers of Land) is furnished by only five States, namely, Mysore, Banganapalle, Cochin, Barwani, and Alwar.

Column 2.—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in Southern India. In States where there has been no professional survey, the figures are based on the best available information.

Column 3.—In this column is deducted the entire area for which the statistics required for Tables II and III are not forthcoming in whole or in part. This area comprises chiefly estates held on privileged tenures, which have not yet been surveyed and which possess at present no agency for the annual collection of agricultural statistics. As surveys extend and the organisation of village statistical establishments develops, the area in this column is reduced, and that entered in the next columns (4 and 5) and dealt with in Tables II and III is correspondingly increased.

Columns 4 and 5.—Column 4 is a check on the accuracy of column 5. In the latter, "village papers" mean "the papers prepared by the village accountants." In States where no village papers exist, or where the source of information is the same for both the survey and the village papers, the figures in column 4 are necessarily repeated in column 5. The area in village papers may differ somewhat from that given by the Survey Department, (a) because, while the survey area is calculated in block, the area by village papers represents the added total of field and village areas, and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads is not always uniform in the two sets of returns.

(a) Previous year's figure repeated [vide footnote (a) on page 14]

(b) Column 3 states the area of unsurveyed forests.

(a) Column 3 states the areas of jagir and other alienated lands.

(b) Column 2.—As there has been no revenue survey so far, this column states the area of the State according to the best available information. Column 3 states the areas of jagir and muafi villages, the boundaries of which have been demarcated, but for which the statistics required for other tables are not available. Columns 4 and 5.—In the absence of any revenue survey data, the figures in column 5 are repeated in column 4.

(c) Column 3 states the area held by jagirdars and udakdars, as well as the muafi plots in khalsa villages for which no separate record is maintained.

These represent about 80 per cent of the aggregate area of all the States comprised in the group. The returns, however, relate only to the settled portions of the reporting States, except Bilaspur, Baghal, and Mehlog, for which complete returns have been received. Column 2 states the area of the settled portions of the States named above, except Bilaspur, Baghal, and Mehlog, for which the whole area is included.

Column 2.—The definition of the term "forests" is as follows:—"Any land classed or administered as forest under any legal enactment dealing with forests." Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area cropped), an explanation being given in a note.

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

Column 4 includes groves not classed in the cropped area. Areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column.

Columns 5 to 13 state the area actually irrigated during the year, areas cropped more than once being counted once only.

(a) The statistics collected in 1908-09 have been repeated up to 1912-13, as fresh information could not be collected owing to press of work connected with the revenue settlement of the State.

(b) Column 2 states the area of reserved forests within surveyed villages.

(c) Includes 8,215 acres in coffee estates.

Column 2 states the areas of state and district forests and of plantations.

Column 3 includes not only lands absolutely unfit for cultivation, but also lands reserved for pasture, and plantations intended for public use and therefore left unassessed. A large portion of the pasture lands is fit for cultivation, and is given out for cultivation from time to time under special orders, such lands when given out for cultivation being transferred from column 3 to 5 or 6 as the case may be.

Column 4 states unoccupied assessed waste.

Column 5.—There is no system of fallows, that is, lands are not systematically left uncultivated for the purpose of giving them rest. Individuals occupy large areas and pay full assessment thereon, leaving portions uncultivated, generally for the use of their cattle. For purposes of account the difference between the areas of the lands occupied by individuals and of those actually cultivated by them is taken as fallow. The lands occupied and assessed are sometimes unfit for cultivation, having been taken up on full assessment merely for use as pasture, but the exact area of all such lands cannot be ascertained, although it cannot be large.

Note.—In this table are entered the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to the failure of the first sowings, have been devoted to other crops: in such cases the area first sown is omitted. In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulae prescribed by higher authorities

(a) See footnote (a) on page 55

(b) Includes millets, maize, and gram.

(c) In Travancore no accounts are kept regarding the area under each crop, and the figures shown in this table, up to 1917-18 are based on very rough estimates. An improved system has been introduced by the Darbar according to which accurate figures are available in some cases from 1918-19.

Entry 2 (a).—Areas held revenue-free or at privileged rates should be deducted, but the deduction need not be made where such areas are any case less than an entire village, and where there is any difficulty in estimating the corresponding deduction to be made in the population (read 10). Areas should not be entered in this column merely because the assessment due from them has been suspended or remitted on account of short crops, or for other special reasons.

Entry 3.—This column should be sub-divided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste.

* These are *khalsa* or state lands only. The whole area of the State according to the census of 1911 is stated in Table I—No. 5** *Alwar*.—The classes of tenure are zamindari and village communities, the former comprising zamindari-*bil-ijmal* and the latter *pattidari* and *bhaiyachara*. Item 1 states the area by village papers (column 5 of Table I). Item 2 (a) shows areas covered with forests (column 2 of Table II) which are wholly revenue-free.†† *Jhalamar*.—The whole area stated in this table is classed as "Khatadari" and "Watondari" equivalent to "raiya-wari" and "zamindari" respectively. Item 1 excludes entire villages held by jagirdars and udaldars.

Entry 4.—Where land revenue includes the zamindar's share, the net demand should be entered, and the table should state the payments due by the zamindars to Government, not those by the raiyats to the zamindars. The actual realisable demand on account of the year should be entered, after excluding arrears for past years. This column should include all the heads classed as "Land Revenue" in the Civil Accounts.

Entry 5.—The population in entry 5 is that of the last general census.

* Entry 7.—As in entry 4 but only ordinary land revenue on fully assessed areas is to be entered.

† Narsingdrh.—Item 1 states the net area by revenue survey as shown in column 4 of Table I. Item 2 (a) includes forest areas (column 2 of Table II) and unculturable (column 3 of Table II) and culturable land not possessed by any cultivator. Item 2 (b) states the area of minor muafis. Item 3 (b) includes fallow lands left uncultivated for three years or less as full cultivation rate is assessed on them.

Note.—It is optional with the local authorities to enter or omit transfers of lands held by tenants. The following rules have been prescribed for the preparation of this return:—(1) Changes of entry due to succession, partitions, or simple mortgages are not really transfers and should be excluded from the table, as also should redemptions of mortgage. (2) All temporary transfers, such as leases, should also be excluded, but mortgage with possession should be treated as a transfer and entered in the table. (3) All transfers made by order of a Court should also be included in the table. (4) The word "Court" in the entry "by order of court" should be held to include a revenue Court.

(a) Mysore.—Only permanent transfers are included as by sale or gift, in which the parties concerned apply for and obtain transfers of revenue registry in the village accounts from which the table is compiled. Thus, changes of registry under orders of civil and revenue courts as well as those effected in consequence of the sale of land for arrears of Government revenue are included.

(b) Alwar.—Transfers by mortgage with possession, sale, and gift, both of proprietary and of occupancy rights, whether by order of court or by private contract, are shown in this table. Property confiscated by order of a criminal court, and holdings transferred by order of a civil or revenue court in satisfaction of money decrees or arrears of land revenue respectively are thus included.
